

Buğrahan Yavuzdoğan

BACKEND DEVELOPER

İstanbul, Türkiye · bgrayvzdgn@gmail.com · github.com/bgrayvzdgn · linkedin.com/in/bugrahan-yavuzdogan · bgrayvzdgn.github.io

Backend-focused developer building and maintaining services that run in production. I take a problem from a rough requirement through to something reliable and maintainable, and I care about writing code the next person can pick up without asking me.

EXPERIENCE

Software Developer , Yapidrom Teknoloji	Aug 2025 – Present
Backend of a scooter-sharing platform, turning product requirements into running services.	
– Build and maintain backend microservices, taking a requirement through to something running in production – REST APIs in .NET 8/9 following Clean Architecture – Data modelling with PostgreSQL and Entity Framework Core; Redis for caching – Asynchronous, message-based communication between services with RabbitMQ	
Software Developer (part-time) , Yapidrom Teknoloji	Apr 2025 – Aug 2025
Software Developer Intern , Yapidrom Teknoloji	Dec 2024 – Jan 2025
– Designed and built a backend service with mentorship from the team lead; it went to production after the internship ended and I still develop it today – Worked inside the team's production workflow — Git-based collaboration, code review, CI/CD	

SKILLS

Languages	C#, TypeScript, JavaScript, SQL
Backend	.NET 8/9, .NET Framework, ASP.NET Core, Entity Framework Core, Clean Architecture, Microservices, SignalR
Data & Messaging	PostgreSQL, Redis, RabbitMQ, Hangfire
Frontend	React, Next.js, Tailwind CSS, TanStack Query, React Hook Form, Zod
DevOps & Tools	Docker, GitHub Actions, Git, Serilog, Swagger

EDUCATION

Web Design and Programming , İstanbul University (Open Education)	2025 – Present
Associate degree	
Computer Programming , İstanbul Topkapı University	2023 – 2025
Associate degree
